Read the text to answer questions 26 to 29.

I have a place I love to go. It's a fort, or a clubhouse, where I can go with friends. We can hang out there, plan neat stuff, eat, and rest. Shadow Fort is my favorite place for lots of reasons.

First of all, there's plenty of room for a few kids. It's large (gargantuan to me). The fort is 3 ft. 8 in. high, 5 ft. 3 in. long, and 3 ft. 6 in. wide. There's a place in back (we call it the pantry) for crackers, grapefruit, avacadoes, potatoes, carrots, berries, and Spanish moss. The roof is made of 4-ft. palm leaves and smaller fronds.

Second, this fort is the first structure I ever built, with the help of my friend Kevin. We built it during a light shower. It was only a few vines that tangled together to make a kind of cave that we could crawl under. We worked fast to put palm

fronds and leaves over the vines. "Quick! Let's get inside!" I shouted to Kevin. We got inside in the nick of time. It began to rain powerfully, and oh how the wind blew! But our fort kept us safe and dry. Later we named it Shadow Fort because it sits in a shady area.

Finally, Shadow Fort is my favorite place because it has everything we need. We keep food in the pantry, a small cot to sit on, and we even have a plywood door. One time Kevin fell out of a tree and hurt his ankle. I helped him back to Shadow Fort where he rested on the cot. Then I made some "dinner"—crackers, carrots, and berries for dessert.

Can you see why Shadow Fort is my favorite place? I hope so. When I'm there, I feel happy as a cat with cream!

26. The text mostly talk about the writer's
- favorite interests to do with friends
 - favorite place to visit, Shadow Fort
 - unforgettable story of Shadow Fort
 - nice experience to hang out at Fort
27. On the second paragraph, the writer describes about
- the roof of the room
 - the pantry at the back
 - the height of the room
 - the room for kids at Fort
28. After reading the text above, the writer really hopes that the readers will likely
- have a clear understanding about Shadow Fort
 - be much interested to go to the Shadow Fort
 - know much how to reach the Shadow Fort
 - know the reasons why the Fort is famous
29. "Later we named it Shadow Fort because it sits in a shady area." (paragraph 3)
The underlined word refers to
- fort
 - shady area
 - Shadow area
 - powerful rain

A Trip to the Zoo

Yesterday my family went to the zoo to see the elephant. When we got to the zoo, we went to the shop to buy some food to give to the animals.

After getting the food we went to the nocturnal house where we saw birds and reptiles which only come out at night.

Before having lunch and taking a rest, we went for a ride on the elephant. It was a thrill to ride it. Dad nearly fell off when he let go of the rope.

During lunch we fed some birds in the park. In the afternoon we saw the animals being fed.

When we returned home we were tired but happy because we had so much fun.

30. What does the writer expect the readers get after reading the text above?
- The readers can participate to keep animals well.
 - The readers will have more knowledge about animals.
 - The readers will get an experience about a trip to the zoo.
 - The readers know much the writer's sharing to visit the zoo.

 - They had no time to take a rest in the zoo.
32. ... our family felt tired after visiting the zoo, we were still happy.
- Since
 - Because
 - Although
 - Nevertheles

Read the text to answer questions 33 to 36.

- Prepare your fruits and vegetables by washing them thoroughly and peeling off those that need the skin removed.
- Your juicer features an extra wide chute and thus most fruits and vegetables such as apples, carrots, beats, celery and others will not need to be cut into smaller pieces since they fit in the chute.
- Make sure your juice extractor is properly assembled. Please follow the instructions.
- Ensure the juice extractor and its accessories are clean by following the cleaning and maintenance section of this manual.
- Place the jar or any other container/glass you may wish to use to collect the juice under the spout and make sure the pulp collector is in place prior to begin juicing.

Do not allow the pulp collector container to overfill as this may cause the unit to stall.
- Plug the power cord into an electrical outlet and turn the power on "I."
- Once the juicer is on, place the fruits and vegetables on the food chute and use the food pusher slowly to drive them down. In order to extract the maximum amount of juice, it is important to push the food pusher slowly.
- The juice extractor will separate the juice and the pulp in the jar and pulp Collector while you are juicing.

33. The purpose of the writer in writing the passage is to
- tell us how to operate instructions of juice extractor
 - inform us the way to separate the juice and the pulp
 - describe good fruits and vegetables for juicing
 - show how to start the instructions of juicing
34. Why is it important to push the food pusher slowly?
- To drive fruits and vegetables down well.
 - To extract the maximum amount of juice.
 - To separate the juice and the pulp in the jar.
 - To make fruits and vegetables good and fresh.
35. What should we do before placing the fruits and the vegetables on the food chute?
- Turn the power off.
 - Use the food pusher.
 - Separate juice skin.
 - Turn the power on.

36. "...to be cut into smaller pieces since they fit in the pot." (instruction 2)
The underlined word refers to

 - fruits and vegetables
37. "Why, this is your son! If money can turn into small stones then a boy can turn into a monkey."
The man wants to say that what the neighbour did was
- illogical
 - thoughtless
 - cruel
 - wicked

Read the text to answer questions 37 to 40.

A man had to go on a long travel. He hid his money in a pot and put butter over it. So nobody could see what was there under the butter in the pot.

Then he took the pot to his neighbour and said, "Please keep this pot of butter for me till I come back." He did not say anything about the money in the pot,

A month passed. Two months passed. But the traveller did not come back. His neighbour thought, "I'm afraid he butter in the pot is bad." And he took all the butter out of the pot and saw money there.

He took the money for himself and put many small stones into the pot in the place of money. When the traveller came back, he asked his neighbour for the pot. He carried it home and took out all the butter. He wanted to take the money. But he found only many small stones under the butter. He was very angry. Then one of his friends came to see him. "You look angry, my friend! Why are you angry?" asked his friend.

"Oh, I am a silly man!" And he told his friend the story about the pot of butter, the money and the small stones. "Well, I can show you how to get your money back. Let us go to the forest." And the two friends went to the forest, caught a monkey there and brought it home. "Now you go to your neighbour and say, "Please let your son come with me to the market". "He can help me to carry food from the market".

The man did so. The neighbour sent his son to the man. But they did not go to the market. The man went home with the neighbour's son and locked the boy in his house.

The friend said, "Now go to your neighbour with the monkey and say: "Here is your son." The man did so. The neighbour was very angry. "Take the monkey away and bring back my son!" he said. "Why, this is your son! If money can turn into small stones then a boy can turn into a monkey."

The neighbour understood everything. He brought the money and the man let the boy go back to his father.

37. The story is about a traveler and his ... neighbour.
- wicked
 - arrogant
 - cruel
 - miser
38. What was the man's problem?
- He lost his butter's pot.
 - The neighbour took his money.
 - The butter in his pot was bad.
 - His son became a monkey.
39. How did the man do to repay his neighbour's mistakes?
- Took his son and changed it with a monkey.
 - Changed the bad butter with some stones.
 - Sent his son to the market.
 - Took away his money.

Read the following ads to answer questions 41 to 44.

Earthquakes are the vibrations caused by rocks breaking under stress. The underground surface along which the rock breaks and moves is called a fault plane.

The size or magnitude of earthquakes is determined by measuring the amplitude of the seismic waves recorded on a seismograph and the distance of the seismograph from the earthquake. These are put into a formula which converts them to a magnitude, which is a measure of the energy released by the earthquake. For every unit increase in magnitude, there is roughly a thirty-fold increase in the energy released.

A magnitude 8.6 earthquake releases energy equivalent to about 10 000 atomic bombs of the type developed in World War II. Fortunately, smaller earthquakes occur much more frequently than large ones and most cause little or no damage.

Earthquake magnitude was traditionally measured on the Richter scale. It is often now calculated from seismic moment, which is proportional to the fault area multiplied by the average displacement on the fault.

The focus of an earthquake is the point where it originated within the Earth. The earthquake epicentre is the point on the Earth's surface directly above the focus.

41. What is the main topic of the text above?
- A general description of earthquake.
 - A specific cause of the earthquake.
 - The big power of the Earthquake.
 - The effects of the earthquake
42. The third paragraph explains about
- World War II which happened after earthquake
 - little damage caused by smaller frequent earthquakes
 - the magnitude of earthquake caused by the heavy waves
 - the energy that comes from the magnitude of the earthquake
43. The amplitude of the seismic waves recorded on seismograph determines
- some energy released
 - 10.000 atomic bombs
 - magnitude of the earthquake
 - the rock breaks and moves
44. The report of the earthquake above will likely attract the attention of
- people who live in a sensitive and disturbed area of earthquake
 - some teachers who are teaching their students at a big school
 - policemen who are working to watch some high buildings
 - some people who live near the beaches and the mountains

Ants are social insects and most live in colonies which can be extremely large consisting of millions of members. There are about 20,000 different species of ants and they can be found almost anywhere and in every biome.

There are three different kinds of ants. The queen is the first kind and she has one purpose – to mate. She spends her entire life laying eggs. The second kind of ant is the male who mates with the queen and they don't live very long. The third kind of ant is the female worker and she cannot produce young but she is the one that builds the mounds and supplies the colony with food.

Most ants build some type of mound to live in. Many dig their mounds in the dirt or sand. Some use twigs to make them stronger. Some ants live in fallen logs or trees. Most ants build a system of tunnels under their mound which connect rooms, or chambers, they use for specific purposes. Some of the chambers are used to store food and some are used as nurseries. The rooms are used as resting places for the worker.

The ant's body is made up of three part – the head, trunk and metasoma, or rear. Each ant has six legs that are attached to the trunk. An ant has eyes that allow them to see extremely well because of the many lenses. An ant's antennae are also very special. They allow the ant to hear, taste, touch and smell. Ants use their antennae to touch one another, which is the way they communicate.

45. What is the purpose of writing the text above?
- To explain how ant finds and stores food.
 - To tell us how the ant's body is made up.
 - To classify ants into three different kinds.
 - To give a general information about ant.
46. What made an ant's antennae different from the other animals' antennae?
- They are only used by the ant to communicate with other ants nearby.
 - They allow the ant to hear, taste, touch and smell something around.
 - They have more than 4 different senses to do for something around .
 - They are used solely for touching the other ants as a communicaton.
47. "Ants are social insects and most live in colonies ..." (in paragraph 1)
What does the sentence above mean?
- Ants live with other insects.
 - Ants need much food to live.
 - Ants live without other helps.
 - Ants need the other ants to live.

Once upon a time, there lived as neighbours, a bear and a rabbit. The rabbit is a good shot. In contrary, the bear is always clumsy and could not use the arrow to good advantage.

One day, the bear called over the rabbit and asked the rabbit to take his bow and arrows and came with bear to the other side of the hill. The rabbit was feared to arouse the bear's anger so he could not refuse it. He consented and went with the bear and shot enough buffalo to satisfy the hungry family. Indeed he shot and killed so many hat there was lots of meat left after the bear and his family had loaded themselves and packed all they could carry home.

The bear was very gluttonous and did not want the rabbit could not even taste the blood from the butchering as the bear would throw earth on the blood and dry it up. The poor rabbit would would have to go home hungry after his hard day's work.

The bear was the father of five children. The youngest child was very kind to the rabbit. He was very hearty eater. The mother bear always gave him an extra large piece of meat but the youngest child did not eat it. He would take it outside with him and pretended to play ball with the meat. He kicked toward the rabbit's house and when he got close to the door he would give the meat with such a great kick. The meat would fly into the rabbit's house.
